NAKUL DEV M V

Entry-Level Software Developer | Web and Mobile Development

nakuldevmv@gmail.com | **LinkedIn** | **GitHub** | **Portfolio** | **Kerala, India**

TECHNICAL SKILLS

- **Languages & Databases:** Python, JavaScript, C++, Dart, MySQL
- **Web & Mobile Development:** Flutter, React, HTML, CSS
- **Development Tools:** Git, GitHub, Visual Studio Code
- **Design & Creative Tools:** Figma, Adobe Photoshop, Blender

EXPERIENCE

Prodigy InfoTech   *August 2024 - September 2024*
Android Developer Intern | Remote

- Developed and launched **4 mobile applications** using **Flutter** and **Dart**, enhancing functionality and user engagement.
- Implemented core features such as **Hive DB integration** for data storage, **QR code scanning**, and **interactive gaming mechanics**.
- Improved app performance by **20%** through systematic **testing and optimization** cycles.
- Maintained high code quality with **Git version control** and **collaborative development practices**.

PROJECTS

FindX - Advanced Web Search Tool   *November 2024*
Technologies: Flutter, Google Dorking

- Engineered a **specialized web search application** using **Google Dorking techniques**, enabling users to locate file types like PDFs and media files with **customized queries**.
- Designed and implemented an intuitive **UI, facilitating over 100+ successful user searches** during testing.
- Optimized search algorithms to improve efficiency by **30% compared to initial prototypes**.
- **Live Website** | **GitHub Repo**

Portfolio Website (2024)   *September 2024 - October 2024*
Technologies: Flutter, Dart

- Developed a **responsive portfolio website** using **Flutter**, featuring a **glassmorphic design** and **Bento UI components**.
- Showcased **5+ projects** with live previews, attracting **50+ unique visitors** and generating **10+ recruiter inquiries** within the first month.
- Enabled recruiters to **download resumes** directly, streamlining the application process.
- **Live Website** | **GitHub Repo**

Apple Music Clone   *March 2024*
Technologies: Flutter, Dart

- Built a **music player application** with a modern **UI/UX inspired by Apple Music**, focusing on a **seamless user interface** and **audio playback** functionality.
- Conducted **user testing with 20+ participants**, incorporating feedback to refine the user experience.
- Achieved **90% positive feedback** for accurately replicating the Apple Music design aesthetics.
- **GitHub Repo**

EDUCATION

Anna University   *September 2023 - July 2026*
B.E Computer Science and Engineering   *Coimbatore, Tamil Nadu*
